

Wart Instructions (Common Warts)

- Each night, soak the wart in hot water for 10 minutes. Water should be 45° C (113° F). Use a thermometer.
- Using a dedicated nail clipper, carefully nip off any dead skin.
- Apply a layer of salicylic acid, or other medication, as prescribed by your doctor.
- Return every 2 to 3 weeks for in-office treatment (e.g. freezing, laser, curettage) as prescribed.
- Don't apply a Band-Aid unless instructed to by your doctor.
- Warts can be infectious and spread to other people, as well as to new places on your body. Avoid touching or rubbing them.
